

RapidChek®

Listeria NextDay™ PUR-Blue™ DUO Sampler

The RapidChek® *Listeria* NextDay™ PUR-Blue™ DUO sampler combines a convenient sample collection device and enrichment media for the growth of all *Listeria* species, all in one unit.

How the test works

One part of the unit contains a polyurethane tip swab hydrated in Hi-Cap™ neutralizing broth. The other tube contains pre-made RapidChek® *Listeria* NextDay™ media for the superior resuscitation and growth to detectable concentrations of *Listeria* species in just 24 hours or *Listeria monocytogenes* in 44 hours. Couple the sampler with RapidChek® immunodetection strips for fast, accurate and sensitive detection of *Listeria* species as well as specifically *Listeria monocytogenes* from the environment. Eliminate the need for media preparation and extra handling steps after sampling.

Validations

RapidChek® *Listeria* NextDay™ and RapidChek® *Listeria monocytogenes* are AOAC approved for use on various environmental surfaces such as stainless steel and plastic.

Features and Benefits

Fast & simple procedure

- Sample collection and enrichment media all in one device
- Convenient pre-made media
- Minimal training
- No additional equipment

Easy resource management

- Unlimited scalability
- Storage at room temperature

Reliable results

- RapidChek® *Listeria* NextDay™ and RapidChek® *Listeria monocytogenes* are AOAC approved

RapidChek®

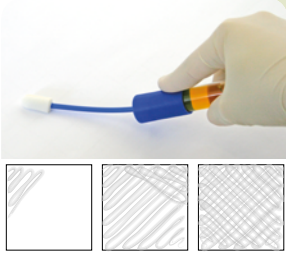

Listeria Next Day™ PUR-Blue™ DUO Sampler

Carefully read the package insert before performing any test.

Sampling and Enrichment

1 All in one device

Take sample.

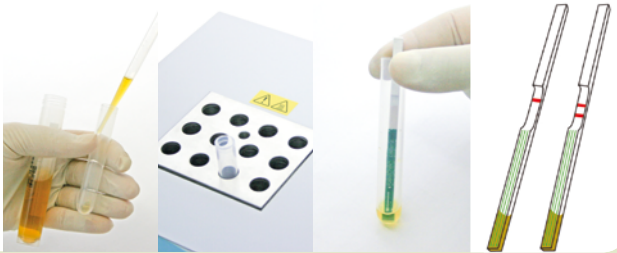

Enrich.

Assay

2 Simple Procedure, Simple Interpretation

Boil (only for *Listeria* species) and Test.
